² The guaranteed rates will not change once the policy is in force.

³ The Multi-Index Monthly Average indexed interest strategy blends the averages of the 3 indexes — the S&P 500®, Nasdaq-100® and Dow Jones Industrial Average® — and ranks the performances to determine the final rate credited to your policy (50% from the best-performing index, 30% from the second-best and 20% from the third-best).

⁴ The annual point-to-point indexed interest strategy compares the initial and ending values of the S&P 500® during a 12-month period to determine the percentage of change in an index.
